ListenHear's specialty custom earmolds are designed to handle sound enhancement and hearing protection challenges in the professional world. Specialty earmolds include: Newscaster/Teleprompter, Pilot Headset, Racing Receiver, and Medical-Stethoscope Molds.

Specialty Earmolds

Sound enhancements and hearing protection

Newscaster/ Teleprompter Mold

Used extensively by broadcast professionals, reporters and law enforcement agencies, this open, skeleton- or canal-style earmold offers clear and discreet two-way communication.

Pilot Headset Mold

Professional pilots have several choices in headset communications that are compatible with the Pilot Headset mold, which features an adjustable boom for microphone positioning. Headset molds are also available in a receiver style without a microphone boom support.

Racing Receiver Mold

Used by motorsports drivers who demand quality communication, the Racing Receiver Mold offers maximum comfort and durability while providing excellent sound suppression underneath any racing helmet.

Medical — Stethoscope Adaptor

Customized Receiver molds can be fit to nearly any stethoscope for added comfort and enhanced hearing ability in noisy medical environments.
